

For a better future

Hydroflex Group cooperates with World Vision in Vietnam - sponsorship for 60 children

Gladenbach / Friedrichsdorf --- Giving back. Promoting the development of children and families in underdeveloped regions in a country in which Hydroflex operates. It was with this goal in mind, that the owners of Hydroflex decided to engage socially with a suitable partner in Vietnam. The brothers Edward and Terry Becker found this suitable partner in the children's charity organization World Vision Deutschland e.V., which has also been carrying out development projects in Vietnam for many years.

"We have an important production facility in Vietnam and visit it regularly," explains Edward Becker. "The kindness and warmth of the people there have fascinated us from the very beginning, as has the whole country". But at the same time he refers to the difficult living conditions specially in underdeveloped regions, in the South-East Asian country with it's over 95 Million inhabitants. "We can achieve something very positive, especially for the children who still have their future ahead of them. Many girls and boys grow up in poor living and hygienic conditions, and partly without kindergarten or school education. To bring help to those who need it most, is a project close to our heart".

The desire to provide effective and transparent help for self-help in Vietnam brought the two entrepreneurs together with World Vision Germany "We want to see and experience where and how our charity projects make a difference", said Terry Becker. The children's charity organization is known for its responsible and transparent handling of donations and provides many insights into the success of its projects. World Vision stays in personal contact with the people and projects it supports and commits to a long-term development plan for a complete region. With sponsorships for 60 children, aged between 3 and 16 years, Hydroflex is now investing in better living conditions and the future of the children and their families in central and southern Vietnam.

For better hygiene conditions and sanitation. For clean drinking water. For good medical care. For a better quality of life in the land of the sons of dragons and fairy daughters.

About Hydroflex Group GmbH

Hydroflex, based in Hesse near Marburg, is a leading supplier and specialized manufacturer of cleanroom cleaning systems. The special product solutions for manual cleaning and disinfection are used in more than 50 countries worldwide. Hydroflex is distinguished by its innovative strength, expertise, and certified quality standards. Renowned companies from the Pharmaceutical industry, Biotechnology, Medical Devices manufacturing, and more are among Hydroflex's customers. With its international production sites, sales offices in Asia and the USA and a worldwide network of distribution partners, Hydroflex has a global presence.

About World Vision

The children's charity organization World Vision has over 70 years of experience in poverty reduction and emergency aid. With employees in around 100 countries, it is now one of the largest independent charity organizations in the world. Through development cooperation projects, thousands of communities are supported in achieving sustainable improvements in the living conditions of children and their families. World Vision also defends their rights and works globally for justice as well as an end to violence against children. With its international network and partners such as Unicef, the World Food Programme and "Aktion Deutschland Hilft", World Vision provides rapid assistance in the event of disasters and supports local crisis prevention. World Vision Deutschland e.V. has offices in Friedrichsdorf and Berlin and has received several awards for transparency.
